Company Profile

Rivers Connect is a Texas-based distributor of broadband, outside plant (OSP), communications, data center, and infrastructure materials.

We work with telecommunications providers, contractors, municipalities, utilities, enterprise customers, and infrastructure teams across the country. Our services include material sourcing, stocking, project staging, logistics, and nationwide fulfillment.

We work with a broad network of manufacturers and stocking partners, which allows us to offer project-specific pricing, quick-turn options, and help with difficult-to-source or time-sensitive material.

Who we work with

- Telecommunications providers
- Contractors
- Municipalities
- Utilities
- Enterprise customers
- Infrastructure teams

OUR SERVICES INCLUDE

- Material sourcing
- Stocking
- Project staging
- Logistics
- Nationwide fulfillment

A broad network of manufacturers and stocking partners means **project-specific pricing**, **quick-turn options**, and help with **difficult-to-source or time-sensitive material**.

Electrical & Infrastructure

- Power & control cable
- Enclosures
- Tools & accessories
- Grounding products
- Installation hardware

Stocking, Staging & Logistics

North Texas locations (map not to scale)

Van Alstyne, TX

RECEIVING • SHIPPING • LOCAL STOCKING • PROJECT STAGING

Our Van Alstyne, Texas location is used for receiving, shipping, local stocking, and project staging throughout North Texas.

16 acres in Paradise, TX

BULK STORAGE • STAGING FOR LARGER PROJECTS

For larger projects, we also have access to 16 acres in Paradise, Texas for bulk storage and staging. Material can be received, consolidated, stored, and released as a project moves forward.

Received → **Consolidated** → **Stored** → **Released**

Capabilities include

- Local stocking and project staging
- Receiving and consolidation
- Bulk material storage
- Scheduled material releases
- Jobsite delivery coordination
- Expedited sourcing
- Local North Texas delivery
- Nationwide fulfillment

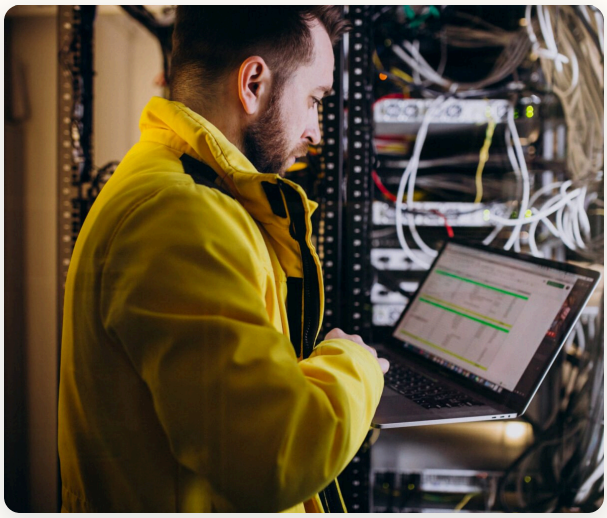

BEYOND THE ORDER

04 Project, Technical & Procurement Support

Our role does not stop at placing an order. We work closely with our manufacturer and vendor partners and can bring them into a project when additional product or technical support is needed.

If a field or installation team has questions about a product, application, or compatibility, we can coordinate directly with the manufacturer to get those questions answered.

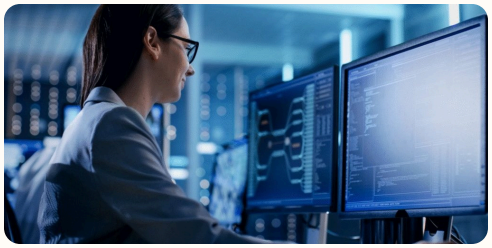

We can also arrange samples, demonstrations, and manufacturer support when a customer is considering an alternate product or brand before using it on a larger project.

Our support includes

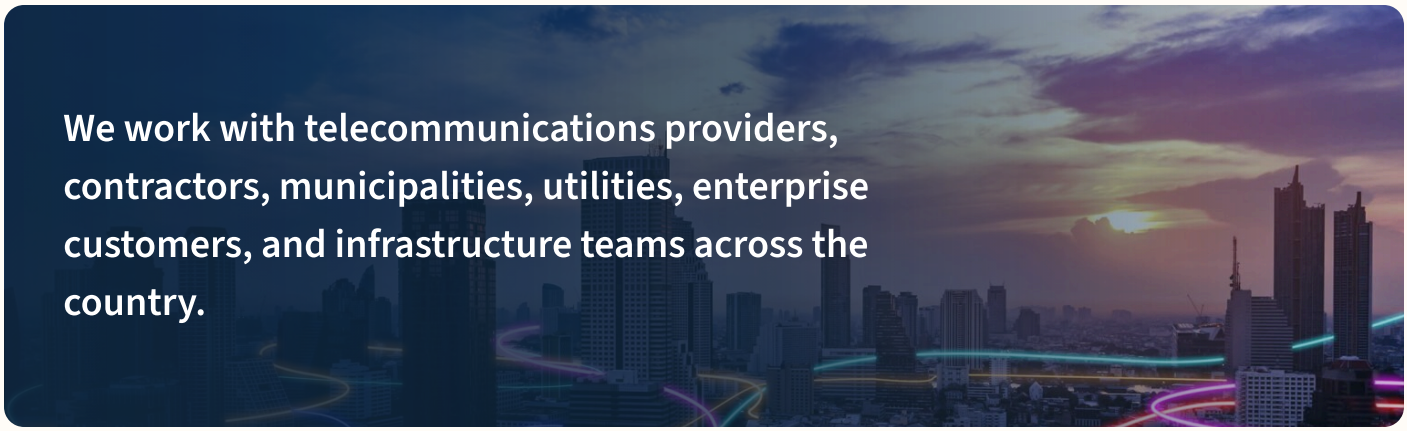

- BOM and project sourcing
- Manufacturer and project-specific pricing
- Hard-to-source and constrained material
- Manufacturer technical support
- Product and application assistance
- Product samples and demonstrations
- Alternate product evaluation
- Coordination with manufacturers and installation teams
- BABA-compliant sourcing when required
- Stocking and project staging
- Material consolidation and scheduled releases
- Expedited sourcing
- Local delivery
- Nationwide fulfillment

Markets Supported

We work with telecommunications providers, contractors, municipalities, utilities, enterprise customers, and infrastructure teams across the country.

- Broadband & Telecommunications
- Data Centers
- OSP Construction
- Electrical & Low-Voltage
- Municipalities
- Utilities
- Transportation
- Government Infrastructure
- Enterprise Networks

06

HOW WE WORK

Our Approach

We try to make material sourcing and logistics easier for the teams we work with.

Whether a customer needs help sourcing a full BOM, finding an alternate product, staging material ahead of a job, or getting something delivered quickly, we stay involved from the initial request through delivery.

Sourcing a full BOM
